Spott Drops

Steel and coloured resins combine in a family of silky smooth discs strung together on leather. Like raindrops filled with colour on the shining surface of a table in a street cafe, they merge and sparkle in the changing lights, reflections of the city day and night. Light and light-hearted, they are a happy little celebration of nothing more and nothing less than colour, stainless steel and leather. Spott Drops are colors trapped in steel—a necklace and a bracelet, earrings and ring, reflections of sunlight dancing in city streets.
